

SRI RAJESHWARI VIDYANIKETAN

HULKOTI -582205

DIST. GADAG (KARNATAKA)

ANNUAL REPORT

Sri Rajeshwari Vidyaniketan, is a co-educational residential cum-day school run on the lines of public schools with special emphasis on education for moral values and all round development of personality. It is affiliated to the Central Board of Secondary Education, New Delhi and has classes from Kindergarten to X (Secondary Level). Established on 13 June 1983 with an initial strength of 44, the school has rapidly grown over the years and now has a strength of over 1800.

A 'dream child' of visionary Late Shri K.H.Patil, the school is established by Shri H.K.Patil and Shri D.R.Patil under the aegis of Sri Sri Sri Tiruch Mahaswamigal Trust with the primary objective of providing much needed quality education to the children in the rural areas and the underprivileged particularly.

The School is located at about 1.5 Kms. on the outskirts of Hulkoti, a village on the National Highway between Hubli and Gadag in Karnataka State. The school spread over 36 acres is suitably situated in a typical Indian rural environment with over a dozen of villages around it.

The school maintains high academic standards with a teacher pupil ratio of 1:35. It has achieved 100% pass so far in the All India Secondary School Examination of the CBSE, with a good number of distinctions.

The residential wing of our school is open to boys studying in V std and above, and has a capacity for 204 boys. The hostel is run on self-help and brotherhood. They are trained to be self-reliant by doing their personal chores on their own such as maintenance of their dress, their surroundings and dormitories self-service in the dining hall etc. We emphasis punctuality and discipline in all aspects of our hostel life which help them to cultivate proper values of life.

CLASSROOMS:

To meet the growing demand for admission, we are making four divisions [of 40 students each] in each class. We have 42 classrooms at present and we plan to construct at least 8 more classrooms in the immediate future. It has assumed particular significance in view of the increasing pressure on admissions coupled with the absence of a similar school in this area.

LABORATORIES:

To develop confidence and kindling the spirit of inquiry in the minds of our children, we have introduced hands on practicals to the students right from V standard onwards. We have separate Physics, Chemistry, Biology, Mathematics and Social Science laboratories at present. The laboratory equipment is also augmented to enable the students to carry out their experiments individually. We also propose to expose our children to the latest development in science and technology by acquiring necessary scientific gadgets, demonstration and working models etc. We propose to have an experimental center and an activity center to develop the inventive and innovative ideas as also creative hobbies among our children. The school is part of nationwide network of Atal Tinkering Lab.

TEACHING AIDS:

Appropriate teaching aids are essential to make learning permanent and pleasurable. While we have a few conventional teaching aids, we would like to equip our school with the modern equipments such as over-head projectors, slide projectors, TVs and CD players, computer-aided instructional equipments, and similar audio-visual equipments, which greatly enhance the effectiveness of teaching learning process. We also introduced programmed learning with the help of Smart class equipments to enable our children to learn at their own pace.

LIBRARY :

We have a library with about 10000 titles. We propose to enrich our library both in range and depth and offer every reader his book. We need to add substantially to our reference section also. We also plan to computerize our documentation and information retrieval systems, so that our library serves as an epicenter for dissemination of knowledge to our students and teachers.

SPORTS COMPLEX AND YOGA HALL :

The school has adequate sports fields for games such as football, hockey, cricket, baseball etc. A 400 mt. track and an indoor stadium for athletics are on the Unveil. Our students have represented in various sports upto the State level and some have been selected and undergone the coaching at the national level sports camps conducted by the Sports Authority of India in various disciplines. The importance of yoga for balanced physical and mental growth needs no emphasis. We plan to build a separate hall for yoga for this purpose. Even though we have a blue print for all these, we are stalling implementation for want of adequate resources.
